Projects

- **Frontend Projects Suite:** May 2025
Built the **frontend** of an **Amazon clone** to practice UI design, layout structuring, and styling using **HTML** and **CSS**, with interactivity powered by **JavaScript**. Along the way, developed smaller projects such as a calculator, to-do list, and a rock-paper-scissors game to apply concepts like **DOM manipulation**, **event handling**, and **responsive design**.
- **Space invader game:** June 2025
Developed a **browser-based 2D shooting game** as a learning project while exploring frontend development. The game features core gameplay mechanics such as **player movement**, **shooting**, **enemy generation**, and **collision**. Incorporated **OOPS** principles were applied to structure game components like **Player**, **Invader**, **Projectile**, and **Particle**, ensuring modularity, reusability, and cleaner code architecture.
- **Study Material Organizer for NIT Trichy:** June 2025
Developed a **web app** for NIT Trichy students to **upload**, **organize**, and **access** semester-wise **study materials**. The frontend was built with **HTML**, **CSS**, and **JavaScript**, while **Node.js** and **Express** handled

backend logic and file uploads. **MongoDB** stored metadata for fast retrieval. The platform helps students easily find and share notes, boosting collaborative learning.
